LEARN TO FLY IN THE LATEST ELECTRIC AIRCRAFT

Starting with your recreational Pilot
Certificate, you will learn to fly solo in a
Light Sport aircraft, giving you the
opportunity to build your skills and
confidence in low-cost electric aircraft.

COME FLY ELECTRIC WITH US!

EXPERIENCE WESTERN
AUSTRALIA FROM A UNIQUE
PERSPECTIVE!

ELECTRIC FLIGHT IS HERE AND NOW!

There are less than 300 electric planes operating in the entire world, so flying in one is a very unique experience! The electric trial flight is a great first exposure to electric sports aviation. You will be on the controls with the instructor as you feel the power of flight.

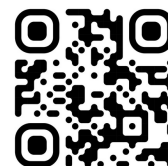

ELECTRIC TRIAL FLIGHT

You'll feel the magic of electric flight in the amazing Pipistrel Electro aircraft and experience something not many people in the world have experienced.

Total time 30-40 minutes. Ages 8-80.

From **AUD \$180 inc. Taxes**

ELECTRIC PILOT TRAINING

Learning to fly in aircraft that will be the future of aviation is not just a good idea for relevant future aircraft management skills, it's also cheaper than traditional flight training. The FlyOnE Skycademy is revolutionising flight training in Australia, building a future-relevant curriculum, training in the newest electric aircraft and providing career paths for young aviators.

WE ARE LOWERING THE COST OF PILOT TRAINING

Electric aviation presents new pilots (and training schools!) with an amazing cost saving. The massively reduced service and maintenance schedule of electric aircraft, coupled with lower energy-per-hour usage, means that our flight school partners can offer you, the new recruit, far greater value using electric trainer aircraft.
